Subject: RE: Riverside Ag Park PCB Site: 13 July 2016 Public Mtg

Partrick,

I agree with your approach. I think we should reserve your travel for a time when you can address the group. While I very much appreciate your presence there last month, I think it is better for the group to know we have invited you at some future time to address some specific concerns.

Also agreed regarding the City Council.

Subject: Riverside Ag Park PCB Site: 13 July 2016 Public Mtg

Good Morning Dot & Peter,

I hope this message finds you both doing well.

Dot, unless you prefer otherwise, I am considering forgoing attending the 13 July Ag Park public meeting down in Riverside. Steve A. has advised us that our travel resources are in short supply and he has prioritized trips down to Riverside for both Kathy Baylor & Sara Ziff to participate in split sampling activities once removal activities recommence. In total, I believe that Steve had budgeted funds for me to attend between 2-3 public meetings in-support of the Off-Site Workgroup – based upon 6 anticipated workgroup meetings?

My sense is that there's some flexibility here, so Dot if you believe the 13 July meeting is a priority, then let me know & we can perhaps revisit this idea? In addition, although neither Steve nor I have heard from the Riverside City Council recently, we were anticipating pushing-back on the idea of discussing the "PCB non-detect in soils" issue in a July city council meeting? At this point, we are not convinced that a council meeting is the most efficient nor appropriate forum for an educational briefing on the concepts of risk-based decision-making.

Best wishes for your 4th of July Holiday.
